Installation Preparation

Remote control installation

Remote control hanger installation

- (1) Place the remote control hanger upright on the pre-installed area of the wall and mark the location of the two mounting holes on the wall with a marker. Drill a hole in the marked position on the wall with a drill bit of 6 mm in diameter, with a depth of 35 mm. (When determining the installation location, note that when the person sits on the seat to ensure that the user can catch the remote control.)
- (2) Put the expansion tube into the wall hole and the hanger is tight against the wall. Align the hole in the hanger with the expansion tube and tighten the screw, and then cover the silicone gasket.

- (3) Put batteries into remote control and cover remote control.

- (4) Put remote control to the hanger.

Notice: Don't install and use the product in damp places such as shower room. Don't place the product in a place where it is easily exposed to water.

Usage Instruction

Other Operations

User Code

- The user code needs to be set to avoid disturbance from remote controls when more than one smart toilets are used in the house. Turn on the toilet for setting while turning off others. Press user code combination buttons (Press "STOP" button first and then press "REAR" button) to enter user code setting mode, the indicator lights will be on and keep flashing.
- Press water volume "+" "-" buttons to select user code. The indicator shows the corresponding user code. Press the user code combination buttons again to save settings and exit. The buzzer beeps and it's set successfully. When the main unit is powered off to restart or batteries are removed from remote control, the user code will be cleared and need to be reset. After entering setting mode, if there's no operation for 10s, the remote control will exit setting mode automatically and return to previous states.

Quiet mode

Long press "SEAT TEMP" button to turn on/off quiet mode.

Auto deodorization

Long press "HALF FLUSH" button to turn on/off auto deodorization function. While the auto deodorization function is on, when it's detected that the user is seated, it'll start deodorizing and stops when user leaves above 3s. The auto deodorization function will turn off automatically during drying. (This function only applies to product with auto deodorization function. This function is set to on by default.)

Automatic pre-wetting button

Press and hold the "STOP" button and press the "DRYER TEMP" button to turn on or off the automatic pre-wetting function. After the automatic pre-wetting function is turned on, the pre-wetting function is performed when the user is detected to be seated. (This button combination is only for toilets with automatic pre-wetting function)

Remark:

- The buzzer will sound "BEEP" when the user presses one button which means the main unit receives the signal and conduct the operation accordingly. If the buzzer doesn't sound, it means the main unit doesn't receive the signal, please adjust the remote control direction and repress the button.
- In case of power cut during wand's spray operation, the wand cannot go back to place, please wait until the power is reset. In case of a power cut for a long period, please push the wand softly back by hand. Do not push hard, to avoid damage to wand and electrical machine.
- The body should touch the seat and the buzzer rings "CLICK", which means functions of front cleaning, rear cleaning and drying are in operation. The nozzle will continue to spray for 1-2 seconds after user stands up during spray operation, so please press "STOP" button before standing up.
